

INTERNAL QUALITY ASSURANCE CELL

STUDENTS' FEEDBACK ANALYSIS

Academic Year 2021-2022

1. Introduction

Students of Assam down town University are provided with a vibrant feedback mechanism to help in creating a conducive environment for them to learn. Students have given their feedback on the teaching learning process employed by various faculty members of Assam down town University. The feedback covers on various aspects like punctuality of faculty member, ability of faculty member to convey the ideas and clarify doubts clearly, learning the objective of the course, satisfaction level of course content *etc.* to name a few.

2. Objectives of the Feedback process

- (i) Gather insights on student experiences with the curriculum.
- (ii) Understand challenges faced by students in learning.
- (iii) Ensure curriculum remains relevant and responsive to student needs.
- (iv) Identify strategies to increase student interest and participation in the curriculum.
- (v) Ensure student-centered education by incorporating diverse perspectives.

3. Methodology for Calculation

The structured questionnaire was developed based on the parameters listed in Table 5.1. Each question is rated on a five-point scale: Excellent (5), Very Good (4), Good (3), Fair (2) and Poor (1). The percentages represent the distribution of responses.

$$\text{Total Weightage} = \sum_{i=1}^5 if_i, \quad \text{5-scale weightage} = \frac{\text{Total Weightage}}{\text{No. of Responses}}$$

The 5-scale weightage provides an average score that helps to summarize the overall quality rating for each question. A 5-scale weightage of 4.18 indicates that, on average; the responses are between good and excellent, leaning more towards Good.

Feedback Mechanism for Stakeholders

4. Description of the Variables

4.1. Articulation of Definitive Program and Subject Objectives in the Curriculum

The articulation of definitive program and subject objectives in the curriculum is essential for providing clear direction and purpose in education. By defining specific, measurable, achievable, relevant, and time-bound (SMART) objectives, educators ensure that students understand what they are expected to learn and accomplish. These objectives guide the development of course content, teaching methods, and assessment strategies, aligning them with desired educational outcomes. Clear articulation of objectives helps in creating a structured learning environment where students can track their progress and instructors can effectively measure and evaluate their achievements. This focused approach not only enhances the coherence and effectiveness of the curriculum but also ensures that educational goals are systematically met, preparing students for both academic success and practical application of their knowledge.

4.2. Internal Assessment and Examination Processes

Clarity in internal assessment and examination processes is crucial for ensuring fairness, transparency, and effectiveness in evaluating student performance. Clearly defined assessment criteria and examination guidelines help students understand what is expected of them, reducing ambiguity and stress. Transparent processes involve providing detailed information on how assessments are graded, the weight of each component, and the feedback mechanism. This clarity allows students to focus their efforts on key learning objectives and improves their ability to perform consistently. Additionally, well-communicated assessment procedures enable educators to conduct evaluations more objectively and provide meaningful feedback that supports student growth. Overall, clarity in these processes fosters an equitable academic environment where both students and educators can engage more effectively in the learning and assessment journey.

4.3. Active Learning and Critical Thinking Supports

Supporting active learning and critical thinking is essential for fostering deep, meaningful engagement with educational material. Active learning involves interactive

and participatory teaching methods that encourage students to take an active role in their learning process, such as through discussions, problem-solving activities, and hands-on projects. This approach helps students to better understand and retain information by applying concepts in real-world contexts. Complementing active learning with critical thinking encourages students to analyze, evaluate, and synthesize information rather than just memorizing facts. By challenging students to question assumptions, explore diverse perspectives, and develop well-reasoned arguments, educators nurture higher-order thinking skills. Together, these strategies create a dynamic learning environment that promotes deeper understanding, enhances problem-solving abilities, and prepares students for complex decision-making in their academic and professional lives.

4.4. Addressing Test Failures: University Remediation Strategies

It is vital for supporting student success and academic growth. Effective remediation involves a multifaceted approach that includes providing targeted support to help students understand their weaknesses and improve their performance. This may include offering supplementary tutoring sessions, creating review workshops, and providing access to additional resources such as practice tests and study guides. Universities might also implement individualized learning plans to address specific areas where students are struggling. Additionally, fostering a supportive environment where students feel comfortable seeking help and learning from their mistakes is crucial. By addressing test failures with proactive and personalized strategies, universities can help students build the skills and confidence needed to overcome academic challenges and achieve their educational goals.

4.5. Assessing the University's Central Library Learning Resources

Assessing the university's central library learning resources involves evaluating the effectiveness and comprehensiveness of the materials and services provided to support students' academic needs. This assessment includes reviewing the range and quality of physical and digital resources such as books, journals, databases, and multimedia materials. Additionally, it examines the usability of the library's facilities, including study spaces, computer access, and research support services. User feedback is also

crucial in understanding how well the library meets students' needs for research and learning. Effective assessment ensures that the library remains a valuable resource, continuously adapting to evolving educational demands and technological advancements, thereby enhancing the overall learning experience for students and faculty alike.

4.6. Evaluating Curriculum: LAB Components and Clinical Skills Training

Evaluating the curriculum's LAB components and clinical skills training is essential for ensuring that students acquire the hands-on experience and practical knowledge needed for their fields. This evaluation involves assessing the effectiveness of laboratory exercises and clinical simulations in providing real-world application of theoretical concepts. Key aspects include the alignment of LAB activities with learning objectives, the adequacy of equipment and resources, and the quality of instruction provided during these practical sessions. Additionally, evaluating clinical skills training focuses on whether students are gaining the necessary competencies and confidence to perform essential procedures and assessments. Collecting feedback from both students and instructors helps to identify areas for improvement and ensures that the curriculum effectively prepares students for professional practice, ultimately enhancing their readiness for careers in their respective disciplines.

4.7. Exploring Innovative Teaching-Learning Methods at the University

It is crucial for enhancing student engagement and improving educational outcomes. This involves integrating new pedagogical approaches such as flipped classrooms, where students review content at home and engage in interactive activities during class, or project-based learning, which emphasizes real-world problem-solving. Incorporating technology, such as virtual simulations, gamification, and online collaboration tools, can also enrich the learning experience by providing diverse and dynamic ways to grasp complex concepts. Additionally, adopting experiential learning methods, like internships and service-learning projects, helps students apply theoretical knowledge in practical settings. By continuously exploring and implementing these innovative methods, universities can create a more engaging and effective educational environment.

that caters to various learning styles and prepares students for the challenges of the modern world.

4.8. Emphasis on Communication Skills in the Curriculum

Emphasis on communication skills in the curriculum is essential for preparing students to excel in both their academic and professional lives. Effective communication encompasses various aspects, including verbal, written, and non-verbal skills, and is crucial for collaboration, presentation, and networking. By integrating communication-focused activities into the curriculum, such as group projects, presentations, and written assignments, educators help students develop clarity, persuasion, and active listening skills. These activities not only enhance students' ability to convey ideas effectively but also build their confidence in interacting with diverse audiences. Prioritizing communication skills in the curriculum ensures that students are well-equipped to articulate their thoughts clearly, engage in meaningful dialogue, and navigate complex professional environments with competence and professionalism.

4.9. University Research Projects: Evaluating Excellence

Evaluating excellence in university research projects involves assessing various facets to ensure high standards of innovation, rigor, and impact. This evaluation includes examining the originality and significance of the research questions, the robustness of the methodology, and the clarity of the findings. Additionally, it considers the relevance of the research to current issues and its potential contributions to the field or society at large. Peer reviews, publication in reputable journals, and successful presentations at conferences are also key indicators of research excellence. By critically evaluating these elements, universities can ensure that their research projects not only advance academic knowledge but also provide meaningful solutions and insights that benefit broader communities. This process helps maintain the integrity and quality of research outputs, fostering a culture of academic excellence and continuous improvement.

4.10. Syllabus Adequacy: Aligning Course Content with Competence Expectations

Syllabus adequacy is crucial for aligning course content with competence expectations, ensuring that students gain the necessary skills and knowledge to meet professional and

academic standards. This alignment involves systematically designing course objectives and materials that reflect the competencies required in the relevant field or discipline. By incorporating industry-specific skills, up-to-date practices, and real-world applications into the syllabus, educators can bridge the gap between theoretical learning and practical demands. Regularly reviewing and updating the syllabus in response to feedback from industry experts and changes in the field helps maintain its relevance and effectiveness. Ensuring that the syllabus aligns with competence expectations not only enhances student learning outcomes but also prepares graduates to perform effectively in their careers and contribute meaningfully to their professions.

5. Student's Feedback analysis

5.1 Student's Feedback Analysis Report

Table 5.1. Question-wise Students' Feedback Distribution on 5-Point Scale

SN	Question's	Excellent	Very Good	Good	Fair	Poor	Total Weightage	Percentage, %	5-Scale Weightage
1	The program and subject outcomes/ objectives are clearly stated in the curriculum.	91	158	39	3	1	1211	72.60	4.15
2	The internals assessment and examination process are described clearly.	98	150	38	4	2	1214	73.52	4.16
3	Do the teaching methods support active learning, multidisciplinary integration evidence-based practice, and the development of critical thinking skills or reflective judgment?	83	155	50	3	1	1192	70.43	4.08
4	Does the curriculum of the university describe how remediation would be accomplished if the student does not pass a test?	89	153	48	2	0	1205	71.35	4.13
5	How do you rate the learning	110	140	42	0	0	1236	74.43	4.23

SN	Question's	Excellent	Very Good	Good	Fair	Poor	Total Weightage	Percentage, %	5-Scale Weightage
	resources in university –central library?								
6	How do you rate the curriculum course content in relation with LAB components, dissection and clinical procedure and skill training program?	84	139	65	3	1	1178	68.84	4.03
7	Does the university have Innovative teaching-learning methods?	92	138	56	5	1	1191	70.78	4.08
8	Is their adequate emphasis on the communication skill on the curriculum?	99	143	46	3	1	1212	72.72	4.15
9	How do you rate the research projects in the university?	83	154	55	0	0	1196	69.86	4.10
10	How do you rate the syllabus of the course that you have studied in relation to the competence expected out of the course?	108	146	38	0	0	1238	74.66	4.24
Average Score							1207.3	71.92	4.13

6. Program-wise Consolidated Report with Justification

6.1 Faculty of Science

Programme	Consolidated Report	Justifications
MSc (Microbiology)	- Enhanced e-learning resources. - Enhance ICT-enabled classrooms. - Experimental and evidence-based learning.	- Students responded that they should be provided access to e-books, journals, interactive modules, notes, and video lectures through institutional ERP system to support diverse learning styles. - Students responded that Classrooms should be equipped with interactive whiteboards, high-speed internet, and audio-visual aids to facilitate dynamic teaching. - Students responded that Syllabus should provide practical components along with theory for experimental skill-based learning.
MSc. (Biotechnology)	- Inclusion of learning through experimentation and proven methods should be a core component. - Boost classroom technology for deeper engagement.	- The students suggested that there should be inclusion of learning through experimentation and proven methods should be a core component. - The students responded classrooms should be equipped with interactive whiteboards, high-speed internet, and audio-visual aids to facilitate dynamic teaching.

Programme	Consolidated Report	Justifications
MSc (Food Nutrition and Dietetics)	• Inclusion of more duration for internship for better job perspective. • Boost classroom technology for deeper engagement.	• The students responded that the longer internships could prepare students for better jobs. • The students responded classrooms should be equipped with interactive whiteboards, high-speed internet, and audio-visual aids to facilitate dynamic teaching.
MSc (Zoology)	• ICT based classroom will be more effective for learning. • Field visit for applied zoology topics. • Experimental and evidence-based learning.	• Students have responded that they should have access to e-books, journals, interactive modules, notes, and video lectures through the institutional ERP system, supporting a variety of learning styles. • Students have responded that Field visit to apiary, sericulture institute and fishery institute should be implemented. • The syllabus should include practical components alongside theoretical content to promote skill-based experimental learning.
MSc (Botany)	• ICT based classroom will be more effective for learning. • Field visit for applied zoology topics. • Experimental and evidence-based learning.	• Students have responded that they should have access to e-books, journals, interactive modules, notes, and video lectures through the institutional ERP system, supporting a variety of learning styles. • Students have responded that Field visit to apiary, sericulture institute and fishery institute should be implemented. • The syllabus should include practical components alongside theoretical

6.2 Faculty of Commerce and Management

Programme	Consolidated Report	Justifications
Bachelor of Business Administration	Students requested more courses that enhance their practical skills and interdisciplinary knowledge.	These courses from various faculties aim to provide a well-rounded education, improve communication skills, digital literacy, environmental awareness, and practical life-saving skills.
Master of Business Administration/ Master of Tourism and Travel Management	- Feedback indicated that students required more comprehensive technical and communication skills training. - Improve students' exposure to the National Stock Exchange.	- Students need to apply theoretical concepts in real-world scenarios, foster collaboration across various fields, and develop a well-rounded skill set. - It gives students practical insights into financial markets and trading, enhancing their understanding of market dynamics and investment strategies.
Bachelor of Hotel Management and Catering Technology/ BA (Tourism Management)	Students highlighted the necessity for strong communication skills and practical technical knowledge.	The courses like Computational Systems and Digital World, Introductory English, Implicative English, and Basic Life Saving Skills from various faculties aim to provide a well-rounded education, improve communication skills, digital literacy, environmental awareness, and practical life-saving skills.
Master of Business Administration (Healthcare Management)	Evaluations revealed a need for better statistical knowledge and communication proficiency among students.	Better statistical knowledge and communication proficiency among students are essential for accurate data analysis and effective dissemination of insights in various professional fields.

6.3 Faculty of Humanities and Social Science

Programme	Consolidated Report	Justifications
MA (Social Work)	- Enhanced e-learning resources. - Enhance ICT-enabled classrooms. - Latest SPSS software should be in library. - More practical and skill-based papers should be introduced.	- Students responded that they should be provided access to e-books, journals, interactive modules, notes, and video lectures through institutional ERP system to support diverse learning styles. - Students responded that Classrooms should be equipped with interactive whiteboards, high-speed internet, and audio-visual aids to facilitate dynamic teaching. - Access to the latest SPSS software provides students and faculty with essential tools for statistical analysis, enhancing research capabilities and data handling skills. - Practical and skill-based papers help students gain hands-on experience, bridging the gap between theoretical knowledge and real-world application.
BA (Social Work)	- Emphasize skill-oriented courses in the curriculum. - Incorporate courses to deal with the issue. - Introduce courses focusing on global issues. - Introduce courses related to entrepreneurship. - Promote extracurricular activities as course. - Ensure that library is stocked with relevant domains.	- Skill-oriented courses equip students with the necessary competencies and practical skills required in the job market, increasing their employability. - Courses designed to address specific issues enable students to develop critical thinking and problem-solving skills, preparing them to tackle real-world challenges. - Courses on global issues raise awareness and understanding of international challenges, fostering a global perspective and encouraging civic engagement.

Programme	Consolidated Report	Justifications
		• Entrepreneurship courses inspire innovation and business acumen, providing students with the knowledge and skills to start their own ventures. • Recognizing extracurricular activities as part of the curriculum encourages holistic development, teamwork, and leadership skills. • Stocking the library with relevant materials supports students' academic and research needs, ensuring they have access to necessary resources.
MA (Applied Psychology)	• The infrastructure of classrooms should be upgraded. • Latest SPSS software should be in library. • Faculties and Library must have access to e-books and journals. • More practical and skill-based papers should be introduced.	• Upgrading classroom infrastructure with modern technology and facilities enhances the learning environment, making it more conducive to effective teaching and learning. • Access to the latest SPSS software provides students and faculty with essential tools for statistical analysis, enhancing research capabilities and data handling skills. • E-books and journals provide up-to-date information and research, supporting continuous learning and academic excellence. • Practical and skill-based papers help students gain hands-on experience, bridging the gap between theoretical knowledge and real-world application.
MSc (Clinical Psychology)	• The infrastructure of classrooms should be upgraded.	• Upgrading classroom infrastructure with modern technology and facilities enhances the learning environment, making it more conducive to effective teaching and learning.

Programme	Consolidated Report	Justifications
	• Latest SPSS software should be in library. • Faculties and Library must have access to e-books and journals. • More practical and skill-based papers should be introduced.	• Access to the latest SPSS software provides students and faculty with essential tools for statistical analysis, enhancing research capabilities and data handling skills. • E-books and journals provide up-to-date information and research, supporting continuous learning and academic excellence. • Practical and skill-based papers help students gain hands-on experience, bridging the gap between theoretical knowledge and real-world application.
BA (Psychology)	• Subjects like General Elective/Discipline Specific Electives should be introduced. • Students should be given the Course Handouts and the evaluation process to be discussed. • Curriculum should be updated as per demand. • Signing of MOUs with Organizations and Community Exposure. • Syllabus must be updated according to the present demands for competency and skills.	• Offering electives allows students to explore different fields of study, promoting interdisciplinary learning and flexibility in education. • Providing course handouts and discussing evaluation processes ensures transparency and helps students understand expectations and assessment criteria. • Regularly updating the curriculum ensures it remains relevant and meets the evolving needs of the industry and society. • MOUs with organizations provide students with practical exposure, internship opportunities, and industry insights, enhancing their career readiness. • An updated syllabus ensures that students acquire the necessary skills and competencies required by current job markets and industries.

Programme	Consolidated Report	Justifications
MA (Sociology)	• Emphasize fieldwork in the course. • Incorporate group discussions and interactive sessions. • Facilitate internship placements for students. • Ensure the library is stocked with must-have books for all courses.	• Fieldwork provides practical experience and real-world exposure, enhancing students' understanding and application of theoretical concepts. • Group discussions and interactive sessions promote critical thinking, communication skills, and collaborative learning. • Internships provide practical experience, industry exposure, and opportunities for professional networking, helping students transition from academia to the workforce. • A well-stocked library with essential textbooks and reference materials supports students' academic needs and research activities.
BA (Sociology)	• Emphasize fieldwork in the course. • Incorporate group discussions and interactive sessions. • Introduce practical components and activities. • Promote an interdisciplinary approach in extracurricular activities. • Ensure the library is stocked with must-have books for all courses.	• Fieldwork provides practical experience and real-world exposure, enhancing students' understanding and application of theoretical concepts. • Group discussions and interactive sessions promote critical thinking, communication skills, and collaborative learning. • Practical components and activities enhance skill development and provide hands-on experience, crucial for understanding and applying theoretical knowledge. • An interdisciplinary approach in extracurricular activities fosters creativity, critical thinking, and a well-rounded education by integrating knowledge from various fields.

Programme	Consolidated Report	Justifications
		A well-stocked library with essential textbooks and reference materials supports students' academic needs and research activities.
BA (Performing Arts)	- Emphasize Practical in the course. - Incorporate group discussions and interactive sessions. - Facilitate Industry visit for students. - Promote an interdisciplinary approach in extracurricular activities. - Ensure the library is stocked with must-have books for all courses.	- Practical components in the curriculum enhance skill development, providing students with hands-on experience that is crucial for understanding and applying theoretical knowledge. - Group discussions and interactive sessions promote critical thinking, communication skills, and collaborative learning. - Industry visits provide practical exposure, helping students understand industry practices, technologies, and work environments. - An interdisciplinary approach in extracurricular activities fosters creativity, critical thinking, and a well-rounded education by integrating knowledge from various fields. - A well-stocked library with essential textbooks and reference materials supports students' academic needs and research activities.

6.6 Faculty of Paramedical Sciences

Programme	Consolidated Report	Justifications
BSc (Bachelor of Optometry)	• Frequent clinical exposure must be implemented. • Students should be given more choices of interdisciplinary subjects.	• Students have suggested frequent clinical exposure to provide the students with practical learning, hands-on experience, and the application of knowledge in real-world settings. • Students have suggested that offering a range of interdisciplinary subjects allows students to tailor their education to match their interests and career aspirations more closely.
BSc (Bachelor of Trauma, Emergency and Disaster Management)	• Inclusion of learning through experimentation and proven methods should be a core component. • Provision for psychological counselling of students may be made.	• The students suggested that there should be inclusion of learning through experimentation and proven methods should be a core component. • University has in campus psychological counsellor for students as well as staff.
BSc (Bachelor of Dialysis Technology)	• Frequent clinical exposure must be implemented. • Students should be given more choices of interdisciplinary subjects.	• Students have suggested frequent clinical exposure provides the students with practical learning, hands-on experience, and the application of knowledge in real-world settings. • Students responded that interdisciplinary subjects promote critical thinking by challenging students to synthesize information from multiple sources and viewpoints.

Programme	Consolidated Report	Justifications
BSc (Bachelor of Medical Laboratory Technology)	• More exposure to medical procedures and techniques. • Students should be given more choices of interdisciplinary subjects.	• Students have suggested students should learn medical procedures and techniques under the guidance of experienced healthcare professionals. • Interdisciplinary subjects promote critical thinking by challenging students to synthesize information from multiple sources and viewpoints.
BSc (Bachelor of Operation Theatre Technology)/ BSc (Bachelor of Critical and Intensive Care Unit Technology)	• More focused hands-on training in equipment handling should be provided. • Frequent clinical exposure must be implemented.	• Suggested that collaboration with online education offer training on specific skills or subjects, allowing students to deepen their knowledge in a particular area of interest.
BSc (Bachelor of Radiography and Advanced Imaging Technology)	• Students should be given more choices of interdisciplinary subjects. • Focus on development of clinical skills.	• Interdisciplinary subjects promote critical thinking by challenging students to synthesize information from multiple sources and viewpoints. • Students have suggested frequent clinical exposure to provide the students with practical learning, hands-on experience, and the application of knowledge in real-world settings.
MSc (Master of Emergency and Critical Care)	• Provision for psychological counselling of students may be made. • Students should be given more choices of interdisciplinary subjects.	• University has in campus psychological counsellor for students as well as staff. • Students have suggested that offering a range of interdisciplinary subjects allows students to tailor their education to match their interests and career aspirations more closely.

Programme	Consolidated Report	Justifications
MSc (Master of Medical Laboratory Technology)	• More exposure to medical procedures and Techniques. • Students should be given more choices of interdisciplinary subjects.	• Students have suggested students should learn medical procedures and techniques under the guidance of experienced healthcare professionals. • Students have suggested that offering a range of interdisciplinary subjects allows students to tailor their education to match their interests and career aspirations more closely.
Bachelor of Physiotherapy	• Industrial visit needed.	• These visits offer firsthand exposure to real-world applications, processes, and technologies within relevant industries.
Master of Physiotherapy	• Clinical postings and industrial visit needed.	• Clinical exposure is tailored according to the specialty the students, offered through various health camps and screening programs.
